June 03 – 17, 2024

TRIP REPORT

Photo: Proboscis Monkey from the Kinabatangan River

Borneo - 2024

03rd June – 17th 2024

HIGHLIGHTS

Either for rarity value, excellent views or simply a group favourite.

- 5 Bornean Bristleheads
- Great Argus
- Blue-headed Pitta
- Black-crowned Pitta
- Bulwer's Pheasant
- Sabah Partridge
- Bornean Banded Pitta
- Western-hooded Pitta
- Ruddy Kingfisher
- Philippine Megapode
- Crimson-headed Partridge
- Whitehead's Trogon
- Whitehead's Spiderhunter
- Whitehead's Broadbill
- Black-and-white Bulbul
- Sunda Owlet
- Bornean Stubtail
- Bornean Ground Cuckoo
- Whiskered Treeswift
- Daird's Trogon
- Crested Partridge
- Rhinoceros Hornbill
- Sunda Pygmy Woodpecker
- Ruby-cheeked Sunbird
- Sunda Bush Warbler
- Everett's Thrush
- Helmeted Hornbill
- Wreathed Hornbill
- White-crowned Hornbill
- Black-and-yellow Broadbill
- Sunda Scimitar-babbler
- Rufous-winged Philentoma
- Cinnamon-headed Green Pigeon
- Orangutan
- Bornean Pygmy Elephant
- Proboscis Monkey
- Slow Loris
- Leopard Cat
- Western Tarsier
- Culugo
- Bornean Keelied Pit-viper
- Red Giant Flying Squirrel
- Maroon Leaf Monkey
- Pyrops sultanus
- Lesser Tree Shrew
- Pyrops whiteheadi
- Cliff Racer
- Silvery Leaf Monkey
- Harlequin Flying Frog

SUMMARY:

This has always been one of our favourite tours to run and this year's trip certainly did not disappoint. With many of our bird and Mammal targets seen well, a variety of brilliant food throughout the tour, stunning accommodation, including the World-famous Borneo Rainforest Lodge and of course a fantastic local guide. Our tour started in and ended in Kota Kinabalu. On our first excursion we visited a small Island of the coast where we nailed our first three targets, the Philippine Megapode, Mangrove Blue Flycatcher and Mangrove Whistler. We then made our way to Pine Resorts Hotel where we would spend a couple of days searching for rare and stunning birds in Mount Kinabalu National Park. Our three main targets were all seen, the Whitehead's Trogon, Spiderhunter and Broadbill, with a few added bonuses like the Everett's Thrush and Sunda Owlet thrown in. We then moved to the lowlands of Sepilok where the weather and birds changed drastically. Here we managed to see a number of new target species like the Black-crowned Pitta, Sabah Partridge and one of the highlight Mammal species of the tour, the Western Tarsier. Gomantong Cave and the Kinabatangan River provided us with our best Mammal sightings of the tour as we saw our first Orangutans and Proboscis Monkeys and we even had a surprise sighting of the rare Bornean Pygmy Elephant. Birds were of course fantastic in these areas with all of the Hornbill species seen, along with several species of Trogon and Kingfisher. We then made our way to the Danum Valley where we would spend three nights at the incredible Borneo Rainforest Lodge. The food, the service and just about everything was out of this World, including the wildlife. Blue-headed Pitta, Great Argus and FIVE Bornean Bristleheads were just a few of the highlights, accompanied with Leopard Cat, Slow Loris and almost alien like Culugo. Overall, the tour was a great success as we saw a lot of the outstanding wildlife Sabah has to offer and we also got to sample some of the finest Asian cuisine and hospitality along the way. We can't wait to return again in 2025!

Day 1 - Arrival Day - Kota Kinabalu - 03rd June

After everyone arrived, we gathered around 3 pm and took a bus to visit several spots in Kota Kinabalu. Our first stop was Sembulam, where we checked a couple of trees for roosting Nankeen Night Herons. We got excellent views of around three birds and also spotted a Black-crowned Night Heron and two Sunda Pygmy Woodpeckers. Next, we visited a lovely park called Tanjung Aru, where we enjoyed great views of Asian Glossy Starlings, Spotted Doves, Zebra Doves, many Green Imperial Pigeons, a pair of beautiful Pink-necked Green Pigeons, and a stunning Collared Kingfisher. Our main targets were the Blue-naped Parrot and Long-tailed Parakeet, and we were fortunate to get great views of both. After a short drive, we ended up at Penangbang, where we drove along a small road searching the long grasses. We saw White-breasted Waterhens and Purple Swamphens, and caught glimpses of a Lesser Coucal and a Striated Grassbird, while Cinnamon Bitterns were basking in the sun. We then moved on to Lok Kawi, just a few minutes away, hoping to see Malaysian Plovers, but there were very few birds on the beach. Finally, we made our way back to the hotel for dinner.

Day 2 - Kota Kinabalu - 04th June

After an early breakfast, we drove to the dock and caught a boat, traveling for about 30

minutes to reach one of the many islands in the area. We planned to spend the morning searching for three main species. After a short walk along the trail, we found our first target, the **Philippine Megapode**. Two of these ground-dwelling birds gave us great views for about 15 minutes on a small trail. A little further down the trail, we checked off the other two of our target birds. The Mangrove Whistler and Mangrove Blue Flycatcher which were both seen well after some effort. We had nailed down all three targets in just an hour. A bit more birding along the trail produced sightings of the Olive-winged Bulbul and some delightful Rufous-tailed Tailorbirds. After departing the island and

having lunch back at the hotel, we headed out for the afternoon. Our destination was Likas, where we first visited a local hide and got incredible views of the **Western Hooded Pitta**.

Other birds seen included the Grey-headed Babbler, Oriental Magpie-Robin, Rufous-tailed Tailorbird, and Olive-winged Bulbul. After another short drive, we ended up at a small park where we searched for the Ruddy-breasted Crake. Although we didn't spot the crake, we did see the Yellow-bellied Prinia and the Blue-throated Bee-eater. Just before dark, we visited several ponds along the roadside and saw Wandering Whistling Ducks, Nankeen Night Herons flying overhead, and finally, we got really good views of a White-browed Crake

that had been chased out of the undergrowth by a White-breasted Waterhen. It was a fantastic end to our first full day.

Day 3 - Crocker Range & Tambunan Rafflesia Reserve - 05th June

We began our day with an early departure from the Hotel Shangri-La, taking along a packed breakfast. After about 90 minutes of driving, we arrived at our destination in the Crocker Mountains. Our first stop was the moth sheets, where birds gradually began to gather. The Chestnut-hooded and Sunda Laughingthrushes created quite a commotion around the small garden. Once they moved on, smaller birds started to appear, including the Mountain Tailorbird, Indigo Flycatcher, Little Pied Flycatcher, White-throated Fantail, and White-browed Shrike-Babbler. We then walked just 50 meters down the road to the start of a small trail leading to the partridge feeding station. Overhead, Bornean Swiftlets flew by as we quietly

approached the blind. While waiting, we enjoyed lovely views of both male and female Snowy-browed Flycatchers. Before long, about six **Red-breasted Partridges** came in to feed on the seeds left out for them, giving us gripping views of these secretive birds. The morning got even better when two **Crimson-headed Partridges** appeared, making it a fantastic start to the day. Back on the road, the sun was shining as we walked along, taking in the sounds of the forest. One of the noisiest was the Sunda Bush Warbler, which, after some patience, gave us nice views. The Golden-naped Barbet also kept us entertained for a while. After spending more time around the moth light feeders, we walked further down the road in search of more species. We glimpsed the Hair-crested Drongo, and four Mountain Leaf Warblers put on a show. We also spotted a stunning Bornean Leafbird, Mountain Black-eye, Black-and-crimson Oriole, and, perhaps one of the highlights of the day, the beautiful Chequer-throated Woodpecker. A short drive later, we arrived at a Rafflesia research station, where we were lucky enough to see this iconic flora. Of course, the birding didn't stop, with a female Temminck's Sunbird and two Black-capped White-eyes making brief

appearances. We slowly made our way to Kinabalu Pine's Resort, making a couple more stops along the way. The first stop produced some fantastic species, including a Wallace's Hawk-Eagle, which perched nicely for scope views, as well as Mountain and Bornean Barbets, Little Cuckoo Doves, and a distant Wreathed Hornbill. A quick roadside stop to look for the Bornean Bulbul was unsuccessful, but we did get a nice consolation with a Brush Cuckoo giving us fantastic views. Our final stop before reaching the hotel was by a big dead tree along the roadside, where five White-fronted Falconets were perched. These are among the smallest raptors in the world and provided a brilliant end to the day.

Day 4 - Mount Kinabalu National Park - 06th June

After an early breakfast, we made our way to the entrance of Kinabalu Park and collected our tickets. A short drive later, we were already onto our first major target bird, the Everett's Thrush. Despite being quite elusive, we managed to get some good close views of this bird working its way through the undergrowth. We then spent some time walking the road and we enjoyed sightings of Black-cap White-eye, Temminck's Babbler, Mountain Leaf Warbler, and both Sunda and Chestnut-hooded Laughingthrush. As we continued through the park we managed our first views of Bornean Green Magpies, followed closely by Black-sided Flowerpeckers, a large flock of Chestnut-crested Yuhinas, and the vibrant Temminck's Sunbird. After

an action-packed morning, we slowly made our way back towards the entrance, making several more stops, our morning however was about to get even better. A flock suddenly emerged, containing several Sunda Cuckooshrikes and the brilliant Whitehead's Spiderhunter. After getting some fantastic views of this major target we got a quick tip-off from another birder that led us to another fantastic sighting—the **Sunda Owlet**, often this bird is only heard but we got some spectacular views with the bird performing rather well for our group. It was a brilliant end to the morning. The weather did not improve after lunch, but that did not deter us. We made our way back to the park and quickly added some fantastic species to the list, including **Whitehead's Trogon** and Bornean Stubtail, two fantastic endemics that we were targeting. Mountain Wren Babbler also made an appearance with a small flock coming in close. Later, we slowly made our way back to the hotel after a long day.

Day 5 - Mount Kinabalu National Park - 07th June

Another full day around Mount Kinabalu National Park began with excitement. Within minutes of arriving, we encountered a mixed flock of birds, including three Velvet-fronted Nuthatches—a new addition to our trip list. Temminck's Sunbird was also seen well. Further up the road, we had another encounter with the male and female Whitehead's Trogon, this time, they were bringing food to a chick that sat in the open for us all to see. Not far from the Trogons, we spotted a rowdy pair of Bornean Green Magpies, one of which was attempting to eat a caterpillar nearly half its size. We also got good views of a Bornean Forktail flitting around a small stream. A short drive later, we were out of the vehicle and into a new mixed flock.

This one contained some striking birds, including the Chequer-throated Woodpecker and a lovely Maroon Woodpecker in the treetops. Several Laughingthrushes passed through, including our third and final species, the Bare-headed Laughingthrush, although quite distant we had some really clear views of this strange looking bird, with its bright red bill. **Bornean Stubtail** were still calling and we got some extremely close views after a bit of work from our guide. After this, we made our way to our lunch stop and quickly pulled into Fairy Garden Restaurant, where we saw several Pygmy

White-eyes. After lunch, we returned to the hotel to relax for a while before heading back out for one last attempt to see the Whitehead's Broadbill. Despite the rain and mist making birding difficult, we persevered. After hearing a Broadbill at one stop, we finally got some brief views of this sought-after species at the next stop. It was a great end to the day and our time at Mount Kinabalu.

Day 6 - Poring Hot Springs - Sepilok - 08th June

After an early breakfast, we departed from Pines Resort and drove just over an hour to Poring Hot Springs, where we planned to spend the next three hours birding. The temperature was a stark contrast to what we'd been experiencing, and we quickly encountered some new species around the first car park, including Plain and Orange-bellied Flowerpeckers. We then moved 50 meters to another car park, where we spent the next hour due to the high level of activity. A dead tree in the area was attracting a variety of species. We observed four different Barbet species visiting the tree: Brown, Black-eared, Yellow-crowned, and Golden Whiskered. Additionally, the Greater Green Leafbird and Buff-rumped

Woodpecker made appearances. The Bulbuls were the stars of the show, with ten different species seen around the car park. These included Black-headed, Red-eyed, Streaked, Scaly-breasted, Grey-cheeked, Spectacled, Yellow-vented, **Cinereous**, and Charlotte's Bulbul. The highlight was the stunning Black and White Bulbul, a rare find and a fantastic bonus. We also enjoyed views of the Black and Yellow Broadbill, which gave us some nice views although brief. A walk along the path on the forest edge revealed even more discoveries, such as the Fulvous-chested Jungle Flycatcher, Hairy-backed Bulbul, Yellow-bellied Warbler, Hume's

White-eye, and a very energetic Least Pygmy Squirrel. We also spotted a *Pyrops sultanus*, a white species of Lantern Bug that sat nicely for us in a tree. There was White-crowned Shama, and a Common Flying Dragon, all of which provided excellent views before we returned to the vehicle. After a long drive and a lunch stop, we finally arrived in Sepilok around 4 pm. A short walk around the grounds, following a heavy shower, yielded a few nice birds, including a close Common Iora and several Hornbills, such as the Oriental Pied and Bushy-crested. We then had dinner and prepared for a long day ahead at the Discovery Centre.

Day 7 - Sepilok Discovery Centre - 09th June

We began our day early at the Research Centre. As soon as we unloaded the vehicles, the car park was already bustling with activity. We observed Black Hornbills, Black-and-red Broadbills, Bornean Black Magpies, Ashy Tailorbirds, and Blue-throated Bee-eaters. As we slowly walked the trail, we encountered a variety of species. Olive-winged Bulbul and Black-capped Babbler were among the first sightings, followed by a pair of stunning **Sabah Partridges**. The real highlight came when a beautiful **Black-crowned Pitta** made an appearance, providing us with fantastic views, along with a Lesser Tree Shrew and Low's Squirrel. When we reached an open area of the forest, we saw Black-winged Flycatcher-Shrike, Dusky Munia, Green Iora, Great Racket-tailed Drongo, and a few Fiery Minivets

moving through the canopy. On our way back to the car park, we spotted a Dark-necked Tailorbird, Rufous-winged Philentoma, Slender-billed Crow, a large troop of Pig-tailed Macaques, and a stunning Bornean Keeled Pit Viper. After breakfast, we explored the canopy walk, where we saw a range of great birds, including Verditer Flycatcher, Lesser Cuckooshrike, Little Spiderhunter, Lesser Leafbird, and five species of sunbird such as Crimson, Van Hesse, Ruby-cheeked, Copper-throated, and Red-throated. Back on the trails, we had one of the day's highlights with two brilliant **Red-bearded Bee-eaters**, one of which stuck around and gave us some good photo opportunities. A little further on, we heard a Red-naped Trogon, and after a bit of searching we managed some really nice views. Following lunch at the cafeteria, we returned to the lodge to relax during the hottest part of the day. In the afternoon, we walked a small trail near our lodge, where we saw Black Banded Squirrel and Blue-throated Bee-eater. The standout sightings included Crimson-winged and three White-bellied Woodpeckers. As evening approached, we headed back to the Discovery Centre and added a few more birds to our list before dark, including Black-eared Barbet, Rufous-backed Kingfisher, Rhinoceros Hornbill, Purple-naped Spiderhunter, Little Spiderhunter, and White-bellied Epornis. At dusk, we reached the field office and saw a pair of Thick-billed Green Pigeons and the endemic Yellow-rumped Flowerpecker. We also spotted Yellow-eared Spiderhunter, Banded Woodpecker, and several Bulbul species. Wallace's Hawk-Eagle perched above one of the towers, and a Rufous-bellied Eagle was a nice surprise flying overhead. As night fell, we had our first sighting of Giant Red Flying Squirrels, which put on an impressive display, gliding from tree to tree. Our night walk yielded some incredible finds, including **Pyrops whiteheadi**, another stunning species of Lantern Bug, a Malayan Black Forest Scorpion, a Bornean Tarantula, and the highlight a fantastic Western Tarsier. We arrived back at the lodge tired but full of memories of another brilliant day.

Day 8 - Sepilok - Gomantong Cave - Kinabatangan - 10th June

Our adventure began early with a pre-breakfast birdwatching session around the hotel grounds. In the distance, we spotted an Oriental Pied Hornbill, and a Barred Eagle Owl made a fleeting appearance as it glided into the forest. The morning's highlight, however, was the sighting of Cinnamon-headed Green Pigeons, complemented by views of **Rhinoceros Hornbills**, White-bellied Woodpeckers, Brown Barbets, and Hill Mynas. To our delight, a stunning Red Leaf Monkey—a rare sight in these parts—graced us with its presence. After

a hearty breakfast, we packed the van and set off for Gomantong Cave. The drive was punctuated by some fantastic bird sightings with several stops made on the way, including a

Scarlet-rumped Trogon and a Ruddy Kingfisher, along with Raffle's Malkoha, Buff-necked Woodpecker, and a **Storm's Stork** casually strolling along the road. Upon arrival, a short walk to the cave turned magical when we encountered three Orangutans, including a mother and her baby—truly a sight to behold. At the cave entrance, a Cliff Racer clung to the wall, and inside, we were thrilled to see all four of our swiftlet targets, alongside thousands of bats. We then drove to the Kinabatangan River where we took a short boat ride to the Borneo Nature Lodge, only accessible by river this beautiful lodge was well and truly in the heart of the jungle. In the afternoon, around 4:30, we embarked on our first boat trip along the Kinabatangan River from our lodge. A pair of Rhinoceros Hornbills near a nest box provided us with great views, and as we ventured into a smaller tributary, we were rewarded with sightings of Greater Coucals, Dollarbirds, Blue-crowned Hanging Parrots, Collared Kingfishers, and Pink-necked Pigeons. The mammals stole the show, with the standout moment being the sight of three Bornean Pygmy Elephants, two of which were crossing the river. We also observed Long-tailed and Pig-tailed Macaques, Red and Silver Leaf Monkeys, and as dusk settled, our first Proboscis Monkeys. As the sun dipped below the horizon, a group of Black Hornbills flew across the river, followed by a large flock of Bushy-crested Hornbills. After a delightful dinner, the adventure continued with a two-hour night cruise. The evening's highlights included sightings of three Bornean Small-toothed Palm Civets, five Buffy Fish Owls, a roosting Blue-eared Kingfisher, and the haunting call of the Oriental Bay Owl. The day was nothing short of magical.

Day 9 - Kinabatangan River - 11th June

Our day began once again with an exhilarating boat trip at dawn, the river shrouded in early morning mist. The sky came alive as Wrinkled Hornbills soared gracefully overhead, while a pair of Black-and-red Broadbills posed elegantly for us, their vibrant plumage glowing in the soft light. Navigating a narrow channel, we were treated to sightings of a Red-throated Barbet, a striking Blue-eared Kingfisher, and a troop of Silvery Leaf Monkeys. We were also thrilled to spot our first Malaysian Blue Flycatchers. As we pressed on, a Raffles's Malkoha appeared, swiftly followed by its cousin,

the Chestnut-breasted Malkoha. High in the treetops, two Violet Cuckoos perched, providing a flash of deep iridescence. After a leisurely breakfast, we ventured out again, this time on a

mission to find the elusive Bornean Ground Cuckoo. Along the riverbanks, Wreathed Hornbills and a solitary Storm's Stork kept watch over the water, while a Crested Serpent Eagle made its first appearance. After hours of navigating winding channels, we finally caught a glimpse of the Ground Cuckoo—a rare and elusive treasure. As we journeyed back, two majestic Grey-

headed Fish Eagles soared into view, capping off the morning perfectly. Later, at 4:30, we embarked on our final boat trip of the day. Brahminy Kites perched regally on an open tree, their silhouettes stark against the fading light, while Lesser Adjutants loomed in the distance. A secluded channel revealed a gathering of Purple Herons, each perched elegantly atop the trees. After some careful playback, two **White-crowned Hornbills** swooped in, offering us breathtaking close views. The day ended on a high note as we observed a dominant alpha male **Proboscis Monkey**, his striking form unforgettable, while

a distant Bat Hawk perched near its nest, silhouetted against the setting sun. The day's adventures left us in awe of the incredible diversity and beauty of the wildlife that calls this river home.

Day 10 - Kinabatangan River - Gomantong Cave - Lahad Datu - 12th June

Our morning began with another early boat trip, a peaceful two-hour excursion along the river. The journey was filled with excitement as we enjoyed fantastic sightings of several Hornbill species, and added new highlights to our growing list, including the vibrant Banded Broadbill and a graceful Lesser Fish Eagle. A fig tree along the way became a hotspot of activity,

attracting a variety of species such as Hill Mynas, Little Green Pigeons, and a group of Black Hornbills. After breakfast, we returned to the dock and set off for the drive to Lahad Datu. Along the way, we made a stop at the road leading to Gomantong Cave, where we were treated to stunning views of Black-and-Yellow Broadbills. We also added Sooty-capped Bulbuls and Brown Fulvettas to our checklist. The highlights of this stop,

however, were a beautifully perched **Rufous-collared Kingfisher** and the striking Rufous Piculet, both of which provided unforgettable views. By midday, we arrived at our hotel, taking a few hours to relax before heading out for more birding. In the afternoon, we explored a nearby road, which, though initially quiet, rewarded us with new species like the elegant Emerald Dove and the delightful Scarlet-breasted Flowerpecker. As we made our way back, a magnificent Crested Treeswift swooped overhead, a great end to the day.

Day 11 - Gomantong Cave - Danum Valley - 13th June

After an early breakfast, we returned to the Gomantong Cave entrance road, stepping into a symphony of gibbon calls that filled the morning air. Almost immediately, we spotted a striking Diard's Trogon, soon followed by an excellent view of a Black-bellied Malkoha. A Raffles' Malkoha made a timely appearance as well, and through the scope, we caught sight of an Orange-backed Woodpecker in the distance. Low in the bushes, Black-throated Wren-babblers moved quietly, while **Ferruginous Babblers** allowed for close-up views. Along the roadside, White-bellied Munias flitted gracefully through tall grasses.

We then ascended the mountain, navigating a short but steep trail to a secluded camping spot, where our list grew to include a Grey-breasted Jungle Flycatcher and a Grey-headed Canary Flycatcher. In the distance, the haunting calls of the Great Argus and the elusive Blue-banded Pitta echoed through the trees. After a brief stop for lunch, we took care of some paperwork and began a 2.5-hour drive to the legendary Danum Valley, officially beginning the next phase of our journey. A quick stop along the way rewarded us with sightings of a Spectacled Spiderhunter and a Silver-rumped Spinetail along the entrance road leading to our lodge. By late afternoon, we arrived and took a short walk along the entrance road, where a majestic Wallace's Hawk-Eagle perched overhead, and Horsfield's Babblers serenaded us from the shadows. A fleeting glimpse of a Blue-headed Pitta added an extra thrill, though it quickly vanished back into the forest. At 8 p.m., we set out on a night drive in golf carts, the forest enveloped in darkness. For a while, the forest was eerily silent, but our patience was rewarded when we spotted our first mammal of the night—a well-camouflaged Leopard Cat nestled in a bush. Not long after, a Slow Loris appeared high in the canopy, allowing us a rare and mesmerizing view through the scope.

Day 12 - Danum Valley - Borneo Rainforest Lodge- 14th June

After breakfast, we set out eagerly along the road, ready to uncover more of the region's remarkable avian treasures. Our morning started with a flourish, featuring close views of both Malaysian and Bornean Blue Flycatchers. Soon after, a Blue-crowned Hanging Parrot, Yellow-bellied Bulbul, and Little Spiderhunter graced us with vibrant appearances. High in the canopy, we spotted a Dark-throated Oriole—a new species for our trip—and glimpsed the Scarlet-rumped Trogon partially concealed within the foliage, its plumage a

flash of vivid colour.

Our luck continued with a flurry of bird activity: Scaly-crowned Babbler, Black-throated Wren-Babbler, and Ferruginous Babbler were all spotted in rapid succession. A quick detour down a

narrow trail brought us face-to-face with the elusive Blue-headed Pitta—a stunning bird and an undeniable highlight of the day. Moments later, we witnessed an even more extraordinary sight: five **Bornean Bristleheads** feeding in separate trees, allowing for unforgettable views of this iconic and highly sought-after species. Our list continued to grow with sightings of Bold-striped Tit-Babbler, Spectacled Bulbul, Fluffy-backed Tit-Babbler, and Horsfield's Babbler. Adding to the excitement, we watched a **Whiskered Treeswift**, admired a Diard's Trogon, and witnessed an unexpected moment

as a Black-and-yellow Broadbill fed a young Malaysian Hawk-Cuckoo. Following another small forest trail, we had the privilege of observing a male Great Argus patrolling its breeding grounds—a breathtaking

display from a truly magnificent bird. On our way back to the lodge, we encountered a Sunda Scimitar Babbler and a Chestnut-breasted Malkoha.

A Speckle-headed Vine Snake crossing the road provided a fantastic photo opportunity, and we added Finsch's Bulbul and a rare Spiney Hill Tortoise to our ever-growing list. In the afternoon, a leisurely 90-minute walk brought even more avian highlights, including the White-crowned Forktail, Rufous-tailed Shama, and Red-billed

Malkoha. After dinner, we ventured out on a night walk, discovering an array of fascinating nocturnal creatures: Mouse Deer, Cloud Monitor, Huntsman Spider, and Sambar Deer all made appearances. By a small pond, we spotted a Harlequin Flying Frog, Earless Lizard, and a Triangle Keel-backed Water Snake. Toward the end of the walk, a Brown Wood Owl silently perched nearby, and, as the grand finale, we glimpsed the elusive Culugo—a strange, almost otherworldly creature hanging onto a tree. Another spectacular day drew to a close, with everyone filled with awe and satisfaction.

Day 13 - Danum Valley - Borneo Rainforest Lodge- 15th June

Our early morning at the Borneo Rainforest Lodge started with a peaceful walk along the entrance road. Almost immediately, we encountered a lively flock of Babblers, including Moustached, Black-capped, and Scaly-crowned, all offering excellent views. A Rufous Piculet made another appearance, and we caught brief, distant glimpses of Fiery Minivets high in the canopy. Hearing the elusive calls of Helmeted Hornbills, we paused and were rewarded with scoped views of a female—completing our sightings of all possible Hornbill species in Borneo. Overhead, an Oriental Honey Buzzard soared, and we were delighted to get clear views of

another Black-and-white Bulbul. Just before entering the canopy walkway, a curious Striped Wren-Babbler approached us closely. On the canopy walk, the birding remained exceptional. We spotted Buff-necked Woodpecker, Violet Cuckoo, Scarlet-rumped Trogons, Maroon-breasted Philentoma, Scaly-breasted Bulbul, Dark-throated Oriole, Square-tailed Drongo-Cuckoo, Rufous-crowned Babbler, Puffback Bulbul, and, as a special highlight, another Orangutan with her baby. After lunch and a

restful break, we spent a few hours exploring along the riverbank. Here, we observed **Spotted Fantail**, Grey-cheeked Bulbul, Orange-bellied and Yellow-breasted Flowerpeckers, and the vibrant Bornean Spiderhunter. Later, after dinner, we ventured out on a night drive to try spotting Frogmouths. Unfortunately, the night birds here appear overexposed to playback calls, and we received no responses.

Day 14 - 15 - Borneo Rainforest Lodge- Kota Kinabalu (Bulwer's Pheasant) - 16th & 17th June

Today, we departed from the incredible Borneo Rainforest Lodge and made our way to Lahad Datu to catch our flight. Along the way, we had a few more exciting wildlife sightings, including Forest Pigs crossing the road. We then boarded our flight back to Kota Kinabalu, where we spent the afternoon relaxing before our international flights home. Another successful trip concluded, and we eagerly look forward to next year's tour. For a few people we had one more morning of action as we headed to a private hide a few hours from Kota Kinabalu. This beautifully designed hide that had bathroom facilities and even its own kitchen would be our base for the rest of the day. For the next few hours, we enjoyed **Crested Partridges** as well as several other species including Penan Bulbul, Grey-hooded Babbler, Dayak Blue Flycatcher, Orange-headed Thrush, Emerald Dove and Rufous-

chedsted Flycatcher. At around 8am though, our target bird came in, the unbelievable **Bulwer's Pheasant**. A solo male gave us some fantastic opportunities to photograph this rarely seen species. He was then followed in by several females. At around midday we decided to leave the hide as we had already photographed and seen all of our main targets. We returned to Kota Kinabalu where we would wait for our international flights and conclude this incredible tour. What a way to officially end the tour.

BIRDLIST FOR BORNEO 2024

A = Number of species recorded on tour

B = Number of days out of 15 recorded C = Highest daily count

H = Heard Only N/C = No Count C=Common

This list follows IOC WORLD BIRD LIST v (13.2) as such names may be different from some other taxonomy's

A	SPECIES E = Endemic	SCIENTIFIC NAME	B	C
1	Philippine Megapode	<i>Megapodius cumingii</i>	1	2
2	Wandering Whistling Duck	<i>Dendrocygna arcuata</i>	2	10
3	Red-breasted Partridge E	<i>Arborophila hyperythra</i>	1	6
4	Crested Partridge	<i>Rollulus rouloul</i>	1	4
5	Sabah Partridge	<i>Tropicoperdix graydoni</i>	2	2
6	Crimson-headed Partridge E	<i>Haematortyx sanguiniceps</i>	1	2
7	Bornean Crested Fireback	<i>Lophura ignita</i>	1	3
8	Bulwer's Pheasant E	<i>Lophura bulweri</i>	1	4
9	Great Argus	<i>Argusianus argus</i>	1	1
10	Storm's Stork	<i>Ciconia stormi</i>	3	3
11	Lesser Adjutant	<i>Leptoptilos javanicus</i>	1	2
12	Nankeen Night Heron	<i>Nycticorax caledonicus</i>	2	3
13	Black-crowned Night Heron	<i>Nycticorax nycticorax</i>	2	15
14	Cinnamon Bittern	<i>Ixobrychus cinnamomeus</i>	1	2
15	Purple Heron	<i>Ardea purpurea</i>	1	20
16	Great Egret	<i>Ardea alba</i>	4	10
17	Little Egret	<i>Egretta garzetta</i>	3	C
18	Pacific Reef Heron	<i>Egretta sacra</i>	1	1
19	Black-backed Swamphen	<i>Porphyrio indicus</i>	1	1
