

Madagascar

November 24th – December 13th 2024

TRIP REPORT

Madagascar - 2024

Nov 24th - 13th Dec 2024

TOUR SUMMARY:

We started our Madagascar tour with a long drive from Tana and arrived at Ampijora, where we would spend the next two nights. Ankarafantsika Reserve was full of life and we managed to see most of our main targets including the rare Schlegel's Asity. Coquerel's Sifaka was our first Lemur of the tour and quite a memorable moment. A short boat trip also produced one of the top targets for the tour, the Madagascar Fish Eagle. After our short stay we moved west towards Majunga, to take a boat trip on the Betsiboka River Delta to search for the Bernier's Teal. After quite a bit of searching we were rewarded with two individuals along with plenty of other great species like the Crab Plover. We then drove back to Antananarivo, making an overnight stop on the way. From Tana we then flew to Tulear, the next morning we jumped on a speedboat and charged towards Nose Ve. Here we would walk among the Red-tailed Tropicbirds as they nested, a real treat. A night at a lovely beach hotel was a fantastic place to unwind, although there were still some great things to be seen including Littoral Rock Thrush, and Grey Mouse Lemur on a night walk. The next three nights were spent around Ifaty in search of more endemics. We searched the spiny forests high and low and were rightfully rewarded with some great birds like Thamnornis, Long-tailed Ground-Roller, Running Coua, Madagascar Buttonquail and so much more. We then moved towards Isalo making a number of stops for species like Madagascar Sandgrouse and Madagascar Plover. We made a quick stop at Zombitse forest to get Giant Coua and the very localised Appert's Greenbul. We continued on after lunch to the grassy plains of the Central Plateau, to the isolated limestone Isalo Massif. This remote area was fairly devoid of birdlife but Madagascar Partridge and Benson's Rock Thrush were nice additions. The long drive to Ranamofana then started with a stop at Anja Park to break up the journey. This wasn't any ordinary stop though as we got to watch Ring-tailed Lemurs, arguably Madagascar's most iconic animal. Four nights in Ranamofana was next and the tough terrain and birding was not easy to navigate but we came away with many great species like the Scaly Ground-Roller, Brown Mesite, Madagascar Pygmy Kingfisher, Madagascar Snipe, Crossley's Vanga and Velvet Asity. It wasn't just about the birds though as some of the mammals, reptiles and insects stole the show with great looks at Golden Bamboo Lemur and Brown Mouse Lemur, as well as seeing Madagascar Tree Boa and the crazy looking Giraffe Weavil. Our final destination of the tour was Perinet, where we would spend our last four nights looking for our final targets. This area is home to the legendary Indri, the largest Lemur and although it took us several days, we finally got some good views. The birding was once again tough but we managed a good number of endemics like the Madagascar Rail, Madagascar Owl, Rainforest Scops Owl, Collared Nightjar, Madagascar Blue Pigeon and the Short-legged Ground-Roller. It was a tough three weeks with a lot of walking but as a group we worked hard and were rewarded with so many great birds and other wildlife. We can't wait to return for another tour in 2026.

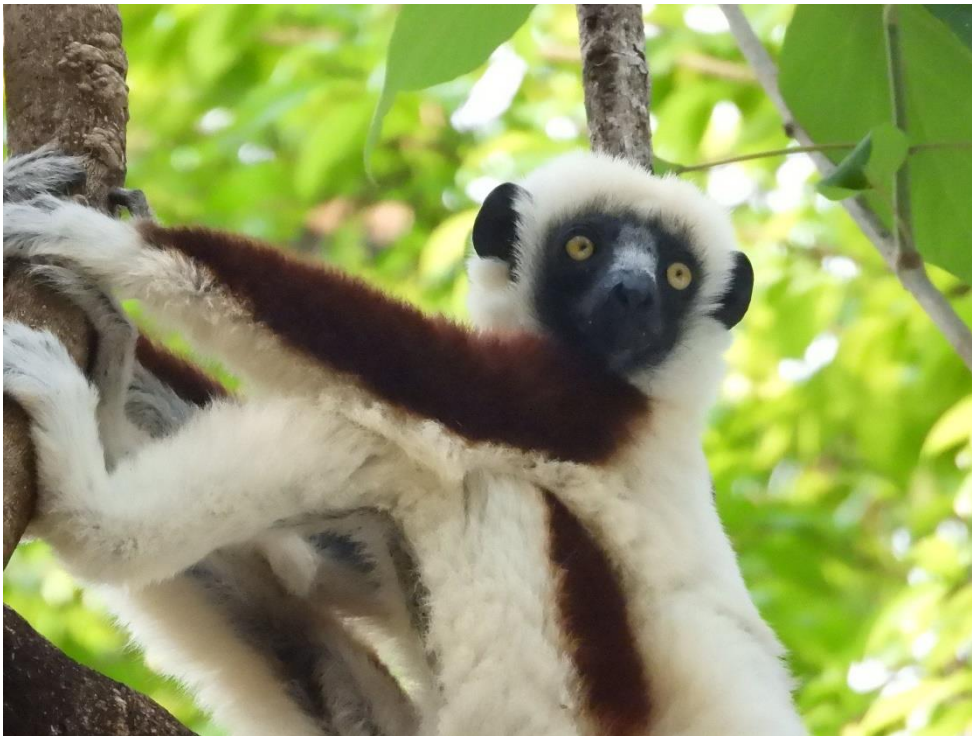

HIGHLIGHTS

Either for rarity value, excellent views or simply a group favourite.

- Scaly Ground-Roller
- Ring-tailed Lemur
- Madagascar Fish Eagle
- Madagascar Rail
- Short-legged Ground-Roller
- Brown Mouse Lemur
- Blue Coua
- Appert's Greenbul
- Brown Mesite
- Bernier's Teal
- Crab Plover
- Crossley's Vanga
- Cryptic Warbler
- Hook-billed Vanga
- Pitta-like Ground-Roller
- Madagascar Flufftail
- Madagascar Jacana
- Madagascar Blue Pigeon
- Giant Coua
- Madagascar Sandgrouse
- Madagascar Wood Rail
- Madagascar Snipe
- Nuthatch Vanga
- Thamnornis
- Rand's Warbler
- Red Fody
- Red-shouldered Vanga
- Running Coua
- Sakalava Weaver
- Long-tailed Ground-Roller
- Velvet Asity
- Crowned Lemur
- Coquerel's Sifaka
- Sickle-billed Vanga
- Tylas Vanga
- Verreaux's Coua
- Van Dam's Vanga
- Madagascar Owl
- Forest Fody
- Humblot's Heron
- Golden Bamboo Lemur
- Collared Nightjar
- Lafresnaye's Vanga
- Littoral Rock Thrush
- Madagascar Partridge
- Madagascar Starling
- Madagascar Yellowbrow
- Blue Vanga
- Madagascar Pygmy Kingfisher
- Nelicourvi Weaver
- Meller's Duck
- Rainforest Scops Owl
- White-browed Owl
- Red-breasted Coua
- Rufous-headed Ground-Roller
- Totoroko Scops Owl
- Schlegel's Asity
- Ward's Flycatcher
- Giraffe Weevil
- Madagascar Tree Boa
- Parson's Chameleon
- Warty Chameleon
- O'Shaugnessy's Chameleon
- Lowland Streaked Tenrec
- Indri
- Grey Mouse Lemur
- Black-and-white Ruffed Lemur
- Madagascar Emperor Moth
- Madagascar Flatid Leaf Bug
- Modeste Day Gecko
- Baron's Mantella
- Madagascar Hissing Cockroach
- Mahfaly Sand Snake
- Three-eyed Lizard

The Broad-billed Roller was a common bird throughout the tour and one of the first birds we saw when arriving in Ankarafantsika National Park.

It was quite a moment to see our first Lemur of the tour. We had a large group of Coquerel's Sifaka around the restaurant of the national park entrance. A real highlight of the tour.

The Western Girdled Lizard was common in the park and several of them were quite large.

The Coquerel's Coua was our first Coua species and a great bird to see in the park. A brilliant family of birds only found in Madagascar

The Madagascar Fish Eagle is one of the main target birds of the entire tour and we were lucky to have great views of two individuals. This bird could be lost in the near future with numbers falling due to habitat lost.

Although distant, we got to see several Crab Plover on our boat trip out of Mahjunga. A bird in its own family, this was another target bird for us.

The Bernier's Teal was our number one target on this boat trip and we managed to see two of these incredibly rare ducks. It took a bit of time and searching but in the end we managed some good views.

The Malagasy Pond Heron was also another success as we saw four birds, amongst a large flock of Little Egret and Cattle Egret.

We saw quite a few Madagascar Hoopoe in a number of locations and some of them gave us great views like this one in Ankarafansika.

Madagascar Jacana proved to be very tricky and after a couple of days of searching we finally found two just before we had to make our way back to Antananarivo.

The Scenery during the tour was outstanding as we visited so many different parts of the Country. It was also cool to see our first Baobab Tree of the tour.

The Olive-capped Coua from some of the dry scrubby habitat before heading to Nosy Be.

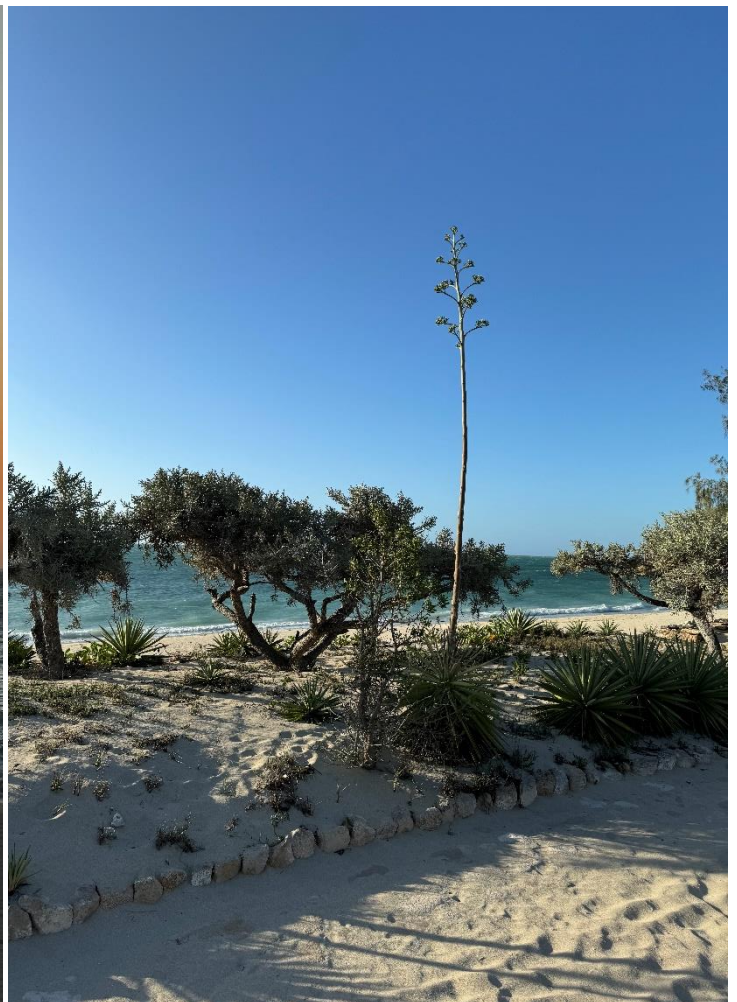

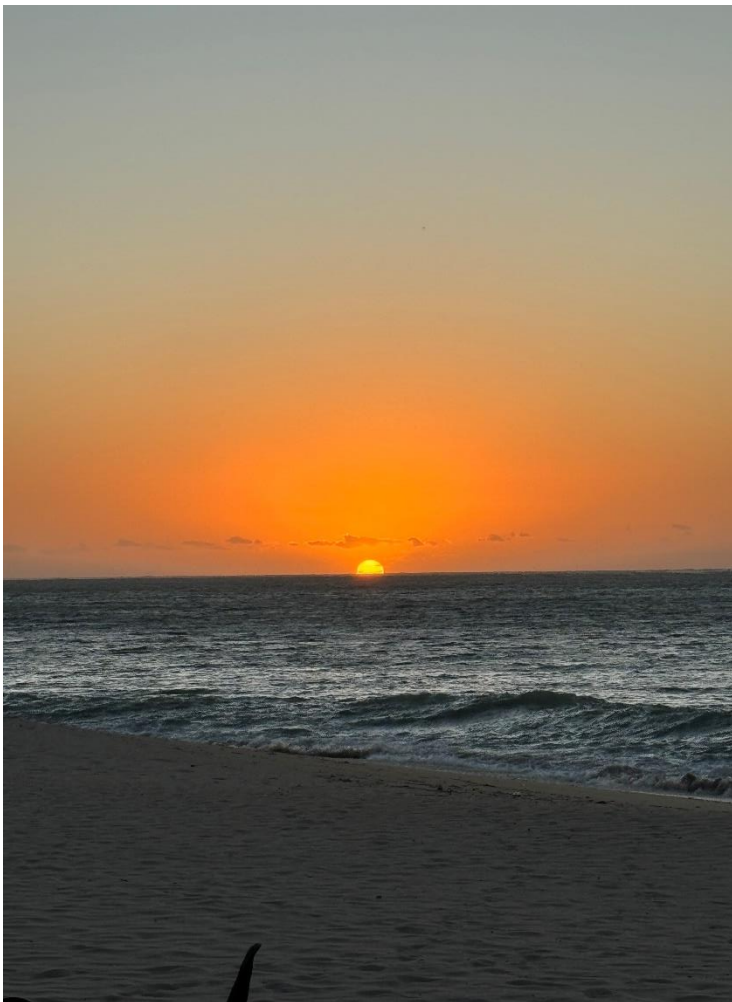

One of the main reasons for visiting Nosy Be is to see the breeding colony of Red-tailed Tropicbirds. Getting to be so close to these birds was a real treat for the group, all while enjoying some of the finest beaches Madagascar has to offer.

The Three-eyed Lizard was common in the sand dunes around our beach hotel and was quite a striking lizard with some beautiful colours.

The scenery from our beach hotel in near Nosy Vey doesn't really need any words. Simply stunning!

A night walk at our beach hotel was highly successful with Grey Mouse Lemur and our first Chameleon of the trip. The Warty Chameleon.

We had several guided walks in Ifaty and they were highly successful. Our first Ground-Roller of the tour was probably the biggest highlight as we watched two Long-tailed Ground-Rollers run right around our feet.

Another bird from Ifaty was the Subdesert Meseite. The Meseite family is another endemic family of birds with three species all only found in Madagascar.

It's always nice to see a roosting Nightjar and this Madagascar Nightjar was a nice find by our local guide, once again proving why it's so necessary to use locals in a Country like this.

Ifaty was also great for some Lemur species and this Milne Edward's Sportive Lemur posed nicely for the group.

Lafresnaye's Vanga showed nicely after a number of hours searching the spiny forest.

The Giant Coua was much easier than some of the other species in the family as this one walked right in front of us on a path in Zombitse Forest.

Malagasy Kestrel was common in the large open habitat around Isalo.

Arguably the most iconic Animal in Madagascar, the Ring-tailed Lemur, it was truly incredible having so many of these animals almost running around our feet.

We had so many encounters with Chameleons throughout our tour and this Oustalet's Chameleon was a stunner.

The Golden Bamboo Lemur was arguably the best Lemur we saw on the tour. This rare animal was only discovered in 1986 and due to habitat loss, there are less than 1,000 individuals left in the wild. Only found in Ranomafana and Andringitra National Park it was great to see several of these critically endangered animals.

It took some time and work but eventually everyone got some views of the incredible Scaly Ground-Roller. The bird made it hard for us but after maybe a good hour of trying to get the bird into an open area we were finally able to enjoy it.

While walking the trails of the National Park at Ranamofana we stumbled across this little Malagasy Paradise Flycatcher on a nest. We couldn't hang around for too long though as we then spotted the Madagascar Pygmy Kingfisher.

The Brown Mesite is the hardest of the three Mesite's to see and after some work from our local guides we were lucky to have one right in front of us.

The Giraffe Weevil was a tour highlight for just about everyone. This unique insect was high on our lists and we got to see quite a few in Ranamofana.

In Ranamofana we were able to see a few Crowned Lemurs as they made their way through the dense forest.

It was incredible to watch this Red-bellied Lemur come from the canopy of a tree all the way down to eye level with us. It hung around for a while allowing for photos and some great views.

We went on a night walk that started with us hanging around a small tree at dusk where this stunning little Brown Mouse Lemur came into some fruit.

Madagascar Pimple-nose Chameleon was another nice find as our Reptile list continued to grow.

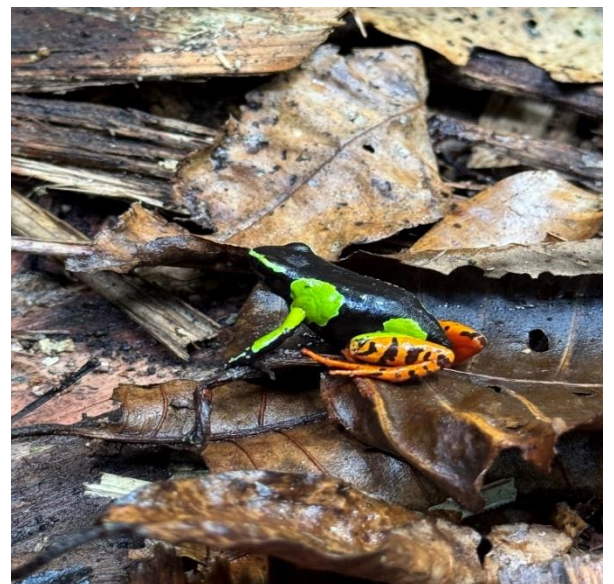

After many flyby views we finally got some great views of the Madagascar Blue Pigeon.

Our local guide was able to find this Collared Nightjar on a day roost.

The Madagascar Ibis can be a hard bird to see but we were lucky enough to be taken to an active nest where we quietly watched this bird move from the nest to the forest floor.

Whilst walking through the forest we were lucky to stumble across this beautiful Baron's Mantella Frog.

The Short-legged Ground-Roller was our last species to see in this endemic family and is one of the harder one's to see. After arriving at a section of forest to look for this bird, our guide heard the bird quite deep into the forest and off the trail. It was now or never as our group crossed a stream and hiked through the dense undergrowth but eventually, we were greeted by some fantastic views, meaning we had completed seeing all 5 of this most sought-after family of birds

Parson's Chameleon was a common species and this was probably the biggest one we saw.

We were lucky to see this Horned Leaf Chameleon crossing the path as we walked through a very wet section of forest.

Maybe one of the biggest surprises was seeing this Lowland Streaked Tenrec on our final night walk of the tour. Our local guide heard the crunching of leaves and dived off into the undergrowth. She gently caught it then proceeded to show off this unique mammal so we could take some photos and learn a little more about this rarely seen creature.

The Indri, the largest Lemur of all Lemur species. Surprisingly this species actually proved to be quite hard to see well. After having several obscured views, we finally made our way off the trail as we heard them calling. Eventually we found ourselves very close to these incredible Lemurs on our final full day of the tour, which made the day well worth it.

Report by Tom Bird

Checklist on following pages:

BIRDLIST FOR MADAGASCAR 2024

A = Number of species recorded on tour

B = Number of days out of 21 recorded – Main Tour C = Highest daily count

H = Heard Only N/C = No Count C=Common

This list follows IOC WORLD BIRD LIST v (13.1) as such names may be different from some other taxonomy's

A	SPECIES Endemic	E =	E	SCIENTIFIC NAME	B	C
1	White-faced Whistling Duck			<i>Dendrocygna viduata</i>	5	12
2	African Pygmy-Goose			<i>Nettapus auritus</i>	1	2
3	Blue-billed Duck			<i>Spatula hottentota</i>	2	10
4	Meller's Duck		E	<i>Anas melleri</i>	1	6

78	Malagasy Sacred Ibis		<i>Threskiornis bernieri</i>	1	1
79	Madagascar Harrier-hawk	E	<i>Polyboroides radiatus</i>	1	2
80	Malagasy Harrier		<i>Circus macrosceles</i>	1	1
81	France's Sparrowhawk		<i>Accipiter francesiae</i>	2	1
82	Black Kite		<i>Milvus migrans</i>	16	C
83	Madagascar Fish Eagle	E	<i>Ichthyophaga vociferoides</i>	2	2
84	Madagascar Buzzard	E	<i>Buteo brachypterus</i>	6	3
85	Western Barn Owl		<i>Tyto alba</i>	2	2

86	Rainforest Scops Owl	E	<i>Otus rutilus</i>	3	2
87	Torotoroko Scops Owl	E	<i>Otus madagascariensis</i>	1	1
88	White-browed Owl	E	<i>Athene superciliaris</i>	1	2
89	Madagascar Owl	E	<i>Asio madagascariensis</i>	1	1
90	Cuckoo-roller		<i>Leptosomus discolor</i>	4	2
91	Madagascar Hoopoe	E	<i>Upapa marginata</i>	5	3
92	Malagasy Kingfisher		<i>Corythornis vintsioides</i>	4	3
93	Madagascar Pygmy Kingfisher	E	<i>Corythornis madagascariensis</i>	2	1
94	Olive Bee-eater		<i>Merops superciliosus</i>	7	10
95	Broad-billed Roller		<i>Eurystomus glaucurus</i>	8	4
96	Scaly Ground-Roller	E	<i>Geobiastes squamiger</i>	2	1
97	Short-legged Ground-Roller	E	<i>Brachypteracias leptosomus</i>	1	1
98	Long-tailed Ground-Roller	E	<i>Uratelornis chimaera</i>	2	2
99	Pitta-like Ground-Roller	E	<i>Atelornis pittoides</i>	2	1
100	Rufous-headed Ground-Roller	E	<i>Atelornis crossleyi</i>	1	2
101	Malagasy Kestrel		<i>Falco newtoni</i>	8	2
102	Eleonora's Falcon		<i>Falco eleonorae</i>	1	1
103	Sooty Falcon		<i>Falco concolor</i>	3	2
104	Peregrine Falcon		<i>Falco peregrinus</i>	3	1
105	Greater Vasa Parrot		<i>Coracopsis vasa</i>	4	10
106	Lesser Vasa Parrot		<i>Coracopsis nigra</i>	5	3
107	Grey-headed Lovebird	E	<i>Agapornis canus</i>	3	3
108	Velvet Asity	E	<i>Philepitta castanea</i>	2	2
109	Schlegel's Asity	E	<i>Philepitta schlegeli</i>	1	2
110	Common Sunbird-Asity	E	<i>Neodrepanis coruscans</i>	2	1
111	Madagascar Cuckoo-shrike	E	<i>Coracina cinerea</i>	5	2
112	Archbold's Newtonia	E	<i>Newtonia archboldi</i>	1	1
113	Common Newtonia	E	<i>Newtonia brunneicauda</i>	8	4
114	Dark Newtonia	E	<i>Newtonia amphichroa</i>	2	2
115	Tylas Vanga	E	<i>Tylas eduardi</i>	2	3
116	Red-tailed Vanga	E	<i>Calicalicus madagascariensis</i>	5	2
117	Red-shouldered Vanga	E	<i>Calicalicus rufocarpalis</i>	1	2
118	Nuthatch-Vanga	E	<i>Hypositta corallirostris</i>	2	4
119	Chabert Vanga	E	<i>Leptopterus chabert</i>	8	2
120	Crossley's Vanga	E	<i>Mystacornis crossleyi</i>	2	1
121	Madagascar Blue Vanga	E	<i>Cyanolanius madagascarinus</i>	6	2
122	Hook-billed Vanga	E	<i>Vanga curvirostris</i>	4	1
123	Ward's Flycatcher	E	<i>Pseudobias wardi</i>	2	2
124	Sickle-billed Vanga	E	<i>Falcula palliata</i>	5	2
125	White-headed Vanga	E	<i>Artamelia viridis</i>	3	2
126	Pollen's Vanga	E	<i>Xenopirostris polleni</i>	1	1
127	Lafresnaye's Vanga	E	<i>Xenopirostris xenopirostris</i>	2	1
128	Van Dam's Vanga	E	<i>Xenopirostris damii</i>	1	2
129	Crested Drongo		<i>Dicrurus forficatus</i>	18	5
130	Malagasy Paradise-Flycatcher		<i>Terpsiphone mutata</i>	10	4
131	Pied Crow		<i>Corvus albus</i>	17	C
132	Madagascar Lark	E	<i>Eremopterix hova</i>	7	6

133	Common Jery	E	<i>Neomixtis hova</i>	7	3
134	Green Jery	E	<i>Neomixis viridis</i>	2	2
135	Stripe-throated Jery	E	<i>Neomixis straitigula</i>	2	4
136	Madagascar Cisticola		<i>Cisticola cherina</i>	9	3
137	Malagasy Brush-warbler		<i>Nesillas typica</i>	3	2
138	Subdesert Brush-warbler	E	<i>Nesillas lantzii</i>	3	5
139	Madagascar Swamp Warbler	E	<i>Acrocephalus newtoni</i>	1	1
140	Grey Emutail	E	<i>Bradypterus seebohmi</i>	1	4
141	Brown Emutail	E	<i>Bradypterus brunneus</i>	1	H
142	White-throated Oxylabes	E	<i>Oxylabes madagascariensis</i>	1	H
143	Long-billed Bernieria	E	<i>Bernieria madagascariensis</i>	3	4
144	Cryptic Warbler	E	<i>Cryptosylvicola randrianasoloi</i>	1	1
145	Wedge-tailed Jery	E	<i>Hartertula falvovirdis</i>	1	2
146	Thamnornis	E	<i>Thamnornis chloropetoides</i>	1	1
147	Madagascar Yellowbrow	E	<i>Crossleyia xanthophrys</i>	1	2
148	Spectacled Tetraka	E	<i>Xanthomixis zosterops</i>	1	1
149	Appert's Tetraka	E	<i>Xanthomixis apperti</i>	2	2
150	Rand's Warbler	E	<i>Randia pseudozosterops</i>	3	1
151	Mascarene Martin		<i>Phedina borbonica</i>	5	C
152	Madagascar Martin	E	<i>Riparia cowani</i>	5	C
153	Malagasy Bulbul		<i>Hypsipetes madagascariensis</i>	17	C
154	Malagasy White-eye		<i>Zosterops maderaspatanus</i>	9	8
155	Common Myna		<i>Acridotheres tristis</i>	20	C
156	Madagascar Starling	E	<i>Hartlaubius auratus</i>	5	3
157	Madagascar Magpie-Robin	E	<i>Copsychus albospectularis</i>	15	C
158	Littoral Rock-Thrush	E	<i>Monticola imerina</i>	1	1
159	Forest Rock-Thrush		<i>Monticola sharpei</i>	3	2
160	Benson's Rock-Thrush		<i>Monticola sharpie bensoni</i>	1	1
161	Madagascar Stonechat		<i>Saxicola sibilla</i>	3	10+
162	Souimanga Sunbird		<i>Cinnyris sovimanga</i>	10	3
163	Malagasy Sunbird		<i>Cinnyris notatus</i>	3	1
164	Nelicourvi Weaver	E	<i>Ploceus nelicourvi</i>	6	4
165	Sakalava Weaver	E	<i>Ploceus sakalava</i>	9	14
166	Red Fody	E	<i>Foudia madagascariensis</i>	12	C
167	Forest Fody	E	<i>Foudia omissa</i>	2	2
168	Madagascar Munia	E	<i>Lepidopygia nana</i>	5	10
169	House Sparrow		<i>Passeer domesticus</i>	4	C
170	Madagascar Wagtail	E	<i>Motacilla flaviventris</i>	10	6
